# Official deployment of the volunteer rescue teams in the first 5 year cycle

# The process of reclassification

- 11 county team have already been reclassified
- Based on the experience we reviewed and rewritten the 4/2013. mandate of the national director general about the regulations of classification exercises →
- **NEW inner regulation: 18/2018.** provision of the national director general about the Regulation of the National Classification System exercises and the appointment of classifiers
- Continuous revision of regulations
- **Creation of value trough the exercises**

vesítés után.

# Experience gathered through classification exercises – general aspects

- **Enthusiastic people**
- **The will do something**
- Well prepared to do their tasks. After the interventions in the last 5 years, they are more prepared than they were at the time of their first classification.
- There is a need for a separate regulation for the classification of smaller teams
- **Solidarity**

# Experience gathered through classification exercises – economic aspects

- When looking at the costs of an exercise, costs related to **sustenance are the most significant.**
- The shortening of the 36 hours long exercises **would result in much lower costs**, the shortening is also vocationally justified.
- **The extra money can be rearranged** for other value creating exercises.

# Experience gathered through classification exercises – participation of profit oriented organizations

- Profit oriented organization take their share from the practical tasks of an exercise **in large numbers, well equipped and in a well organized way.**
- Their presence and work is crucial, **they are role models in well organized, structured work.**
- They also possess the necessary **equipment and tools** for the job.

# The changes in the regulations for classification exercises according to the 18/2018. provision of the national director general I.

- The timeframe of the exercise decreases **megyei from 36 to 24 hours in case of county rescue teams, and from 24 to 8 hours in case of municipal rescue teams.**
- District rescue teams are managed locally.
- For district/municipal rescue teams **the regulations will be easier**, they won't have to adhere to some (eg. introduction of a portfolio).
- They no longer have to do an formation and a pre-classification exercise.

# The changes in the regulations for classification exercises according to the 18/2018. provision of the national director general II.

- Between the five year cycles of national reclassification exercises, **we provide training for county level teams each year, except when they have been deployed that year, every 3 years for district and municipal teams, except if they had been deployed in that or the previous year.**
- The certificate can only be issued by the national director general for disaster management.

# Thank you for your attention!
